

BARRELS FOR BRODY

JUNE
29th
2014

Brody was diagnosed with stage 4 Neuroblastoma at 12 months old on September 21st, 2013. He has been fighting for 9 months. His treatment has consisted of 6 rounds of high dose chemotherapy, Surgery to remove 90% of the tumor, Stem Cell Transplant, 17 rounds of radiation to his entire spine, and currently undergoing antibody therapy for the next 6 months. His chemotherapy was completed at Saint Francis Children's hospital but all advanced surgeries and treatments are done at St Jude Children's Research Hospital in Memphis, TN. During his battle with cancer and due to a suppressed immune system from the chemotherapy Brody has had to be in isolation and inpatient for chicken pox, C-diff, CMV, Shingles, and adenovirus; just to name a few. Neuroblastoma is a very aggressive form of childhood cancer and very painful to endure. Brody has been so tough and fought so hard and will continue to fight with your prayers and support!
